

# MADERA COUNTY ECONOMIC FORECAST

Madera County is located in the heart of the San Joaquin Valley, northwest of Fresno County. Madera County has a population of 142,800 people and 43,900 wage and salary jobs. The per capita income in Madera County is \$21,138, and the average salary per worker is \$32,791.

Although not nearly as robust as Southern California, employment growth in Northern California was strong in 2005, compared to the previous four years. Employment in the greater Bay Area increased by 0.8 percent last year, while the San Joaquin Valley grew at a robust pace of 2.3 percent. In 2005, 1,100 total wage and salary jobs were created in Madera County, representing a solid growth rate of 2.6 percent. However, all of the net growth was in the farm sector as non-farm employment declined 0.1 percent. The unemployment rate increased dramatically in 2005, rising from 8.8 percent to 10.6 percent. Higher unemployment rates in the Central Valley counties are due to the large concentrations of farm employment. In Madera County, the farming sector accounts for 24 percent of total wage and salary jobs.

The principal sectors that are producing jobs are healthcare and education, government, farm and construction. Employment in the professional services sector accounts for less than six percent of total employment, compared to 14 percent at the state level.

From January 2005 to January 2006, Madera was the sixth fastest growing county in California, adding population at a rate of 2.6 percent. The two incorporated cities in the county, Chowchilla and Madera, grew at a rate of 6.5 and 3.6 percent, respectively.

Employment and population are forecast to grow at healthy rates in Madera County over the next several years because inland counties will dominate growth in the state due to the relative affordability and higher production of housing.

## FORECAST HIGHLIGHTS

- Total wage and salary job growth is forecast to increase in 2006 to 2.7 percent, while non-farm job growth advances 3.4 percent. From 2006 to 2010, total wage and salary job growth averages 2.0 percent and non-farm job growth averages 2.5 percent.
- Average salaries adjusted for inflation are currently well below the California state average, and will remain so over the foreseeable future. Real average salaries rise an average of 1.2 percent per year over the next 5 years.
- Between 2006 and 2010, the momentum for employment growth is in professional services, government, transportation and utilities, and education and healthcare services. These sectors account for 69 percent of all jobs created in the county over the next five years.
- The population will continue to grow at a rapid rate in the county. Annual growth in the 2006 to 2010 period averages 3.3 percent per year.
- Net migration will increase to approximately 3,200 people in 2006. Over the next five years net migration is expected to average of 3,400 net migrants per year.
- Real per capita incomes are flat in 2006, as population growth outpaces income. Over the next five years real per capita incomes are forecast to increase by 0.3 percent per year.
- Industrial production is forecast to increase 6.3 percent in 2006. Over the next five years the growth rate will remain high, averaging 5.5 percent per year, due primarily to growth in the transportation and utilities sector.
